

Step 1: Download Visual Studio Code

1. **Go to the official website:** Open a web browser and visit the <https://code.visualstudio.com/Download>
 2. **Choose the right version:**
 - Click on the appropriate download link for your operating system:
 - **Windows**
 - **macOS**
 - **Linux**
-

Step 2: Install Visual Studio Code

For Windows:

1. **Run the installer:**
 - Locate the downloaded .exe file and double-click to run it.
2. **Accept the license agreement:**
 - In the setup wizard, read the license agreement, and click "**I accept the agreement**", then click **Next**.
3. **Select installation location:**
 - Choose the folder where you want to install VS Code (or leave it as the default location), then click **Next**.
4. **Choose additional tasks:**
 - You'll see options like:
 - Create a desktop icon.
 - Add "Open with Code" to the context menu.
 - Add to PATH (highly recommended).
 - Check the boxes for the options you want and click **Next**.
5. **Install:**
 - Click **Install** to begin the installation process. It may take a few minutes.
6. **Launch VS Code:**
 - Once installed, check the "**Launch Visual Studio Code**" box and click **Finish**.
